To the Mayor, Aldermen and Councillors
of the Borough of Lostwithiel.

Ladies and Gentlemen,

I have the honour to
present the Annual Report on the Health and
Sanitary Circumstances of the Borough of
Lostwithiel for the year ended 31st December 1963.

Once again there has been a
nil infantile mortality rate, which fact reflects
credit on both parental and medical and nursing
attention. At the other end of the scale the
provision of 12 flats for old people with a
Warden service is a forward step of real
social significance.

There were few case of infectious
disease during the year.

Mr Setchell has contributed
considerable parts of this report, and while
extending my thanks to him for this, I should
like to draw attention to his unfailing
cooperation.

I wish also to thank the Health
Committee for their unfailing courtesy and interest.

I am,

Your Obediant Servant,

J. McGOVERN

Medical Officer of Health.

SECTION A

Lostwithiel is a quiet country town set in pleasant surroundings in the valley of the Fowey River. The town has many historic associations and has some very well preserved buildings. The only industry of any consequence is the milk depot.

There is a considerable rise in the population during the summer months caused by the influx of visitors.

SECTION B

General Provisions of Health Service

Public Health Officers:

- (1) Medical Officer of Health. J. McGovern, M.B., CH.B., D.P.H.
Area Health Office, Moorland Road,
St. Austell.
Telephone St. Austell 2206.
- (2) Public Health Inspector, C.A.L. Setchell, A.M.I.S.E.,
M.R.S.H.

Laboratory Facilities

These are available at the Royal Cornwall Infirmary, Truro, where all material is sent for investigation.

Diphtheria Prophylaxis

Supplies of diphtheria prophylactic alone, and in various combinations with whooping cough vaccine and tetanus toxoid are available at the Area Health Office. Poliomyelitis vaccine has been readily available and is issued on request.

Ambulance Facilities

The control of ambulances has passed from the Area Health Office to a special control centre at Bodmin. There will be no change in availability and the method of obtaining an ambulance is unchanged.

Nursing in the Home

There is one District Nurse, Midwife-Health Visitor, who is able to cope with all demands. A relief is supplied for all leave and sickness absence.

Home Help

A full time organiser covers the whole Health Area. Eight homes received assistance.

Maternity and Child Welfare

There is no clinic but as the Nurse visits regularly in the home, the health of the children is well supervised. The Nurse works in cooperation with the family doctor.

Hospitals

There are no hospitals in the area and patients are sent to St. Austell, Bodmin, Fowey, Truro and Redruth. Patients with infectious diseases are sent to Truro Isolation Hospital when necessary.

SECTION C

Water Supply

Draw off from the River Fowey Scheme enables adequate supplies of water to be furnished to all parts of the Borough, augmented by the Council's sources at Church Park Wood and Colle Beacon. These supplies are very satisfactory in quality and in quantity. Four new connections to the supply mains were made during the year, and with the exception of a few farms and houses in isolated positions all premises in the Borough have a direct supply.

Samples of water have been taken at frequent intervals from various points on the distribution system during the year as follows :-

No. of samples	12
Results satisfactory	12

Sewerage

Further consideration of the scheme for improvement of sewers and sewage disposal for the Town was held in abeyance.

SECTION D

Housing

Informal notices and interview with owners secured necessary repairs in 38 instances.

Old People's Flats, Mill Gardens:

These twelve old people's flats were completed and occupied in October of this year, and are provided with a very capable and efficient Warden and his wife.

Housing Improvements

Not enough use is being made by property owners of the provisions and assistance available by way of Improvement Grants. During the year 21 applications for Standard Grants were made and approved.

SECTION E.

Meat and Other Foods :

Early in the year the only licensed slaughterhouse in the Town was disposed of, and all home killed meat is supplied to butchers in the Borough from abbatoirs in nearby towns.

Other foods

Tinned and other goods are inspected upon request from retailers, and are properly dealt with - small quantities are condemned from time to time as a result of decomposition or damaged tins.

Milk

Periodic visits are made to the three milk retailers in the Town whose premises are quite satisfactory - bottled milk only being sold as it is received from the bottling establishment.

Cafes, Restaurants and Food Catering Premises

Visits of inspection are regularly made to all food preparing premises and in general the standard of the cleanliness is satisfactory.

SECTION F

Prevalence of and control over infectious and other diseases

The following notifications were received :-

<u>Disease</u>	<u>Number of cases during 1963</u>
Measles	13
Puerperal Pyrexia	2

Diphtheria Immunisation

The following tables gives the number of immunisations carried out during the year.

<u>Children born during the Year</u>								
	1963	62	61	60	59	58-54	53-49	Total
Primary Immunisation	15	18	1	-	-	-	-	34
Reinforcing Injections	-	-	-	-	2	15	33	50

Smallpox Vaccination

5 Primary Vaccinations carried out
and
2 Revaccinations performed.

SECTION F (CONTINUED)

Vaccination against Poliomyelitis

Poliomyelitis vaccine is available. Needless to say the oral vaccine has replaced the Salk vaccine. This, however, is an advantage since the oral vaccine gives a very high degree of protection.

Tuberculosis

The number of cases on the register is given below with the previous year's figures in brackets -

	<u>Male</u>	<u>Female</u>
Pulmonary	5 (5)	5 (5)
Non-Pulmonary	Nil	1 (1)

There were no deaths from tuberculosis.

Tuberculosis Prevention in Children

For some years the Cornwall County Council has offered protective vaccination against tuberculosis to school leavers. The vaccinations are carried out by means of B.C.G. Vaccine, to suitable children, following preliminary skin testing. In 1963 the Scheme was extended to the 11 year and 12 year old groups. In Health Area IV 931 school children received B.C.G. vaccination following skin tests to 1319 children. It is more convenient to give the figures for the Health Area IV than for the Borough of Lostwithiel alone, since there is considerable interchange of pupils from one district to another.
